To Whom it May Concern

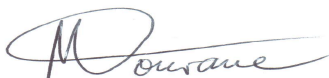

This letter serves to confirm that Mokgope Consulting worked with Nkosinathi Tomose and the team from NGT Holdings (Pty) Ltd (hereafter referred to as NGT Holdings) as heritage consultants, archaeologists (as well as Palaeontologists) and social specialists for the proposed construction of 400 kV/132kV Multi-Circuit (MC) transmission lines planned from the Ariadne Substation to the Eros Substation in KwaZulu-Natal.

The Phase II Heritage Impact Assessment and SIA studies conducted by NGT formed part of a Relocation Action Plan (RAP) developed by Mokgope Consulting as requested by the African Development Bank who are the project funders for the abovementioned powerline being constructed by Eskom Holding SOC Ltd.

We have found NGT to be highly professional, and their character and conduct were beyond reproach. Therefore, we would recommend them for high-level work that is strategic and demands intellectual rigour.

We hope you find the above in order, however should there be any further assistance required please do not hesitate to contact the undersigned.

Yours Sincerely

Dr Mpho Nenweli
