TO WHOM IT MAY CONCERN

Dear Sir/Madam

This letter serves to confirm that we worked with Nkosinathi Tomose from NGT Holdings (Pty) Ltd (hereafter referred to as NGT Holdings) as heritage consultants and archaeologists (as well as Palaeontologists) on the proposed Medupi-Borutho 400kV Transmission Line and the proposed Borutho-Witkop 400kV Transmission Line. This formed part of specialist studies for our environmental assessment practitioner – Baagi Environmental Consultancy CC. They were involved in the following:-

1. Preparation of Heritage Impact Assessment (HIA) and Conservation Management Guidelines for inclusion in the Environmental Management Programmes
2. Phase II HIA and application for heritage rescue permits for mitigation of archeological resources and sites on both lines
3. Rescue of archaeological materials – developing an inventory, cataloguing and storage with Wits Archaeology Department
4. Completion of a rescue report

NGT were committed to quality and attention to the required detail. We would recommend them for the proposed strategic document development and implementation.

We hope you find the above in order, however should there be any further assistance required please do not hesitate to contact the undersigned.

Yours sincerely

Henry Nawa
